

HEPA CABLE LOCK INSTRUCTIONS

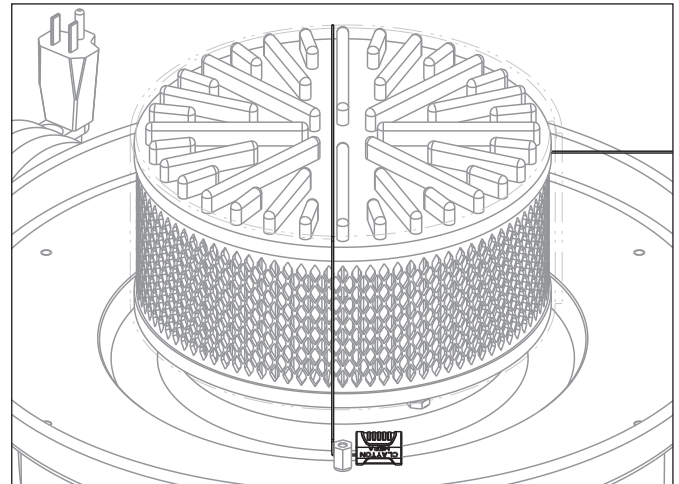

Included:

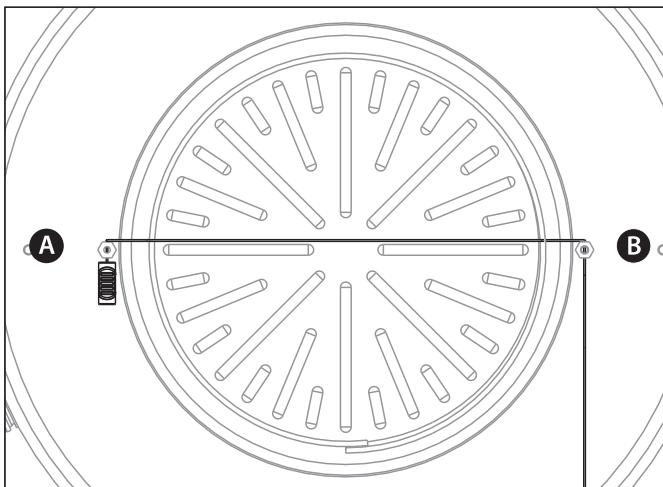

- The enclosed cable lock is an optional accessory that can be used to lock the HEPA filter in place.
- It is not required.
- If you do not want to use the cable lock then simply discard it.

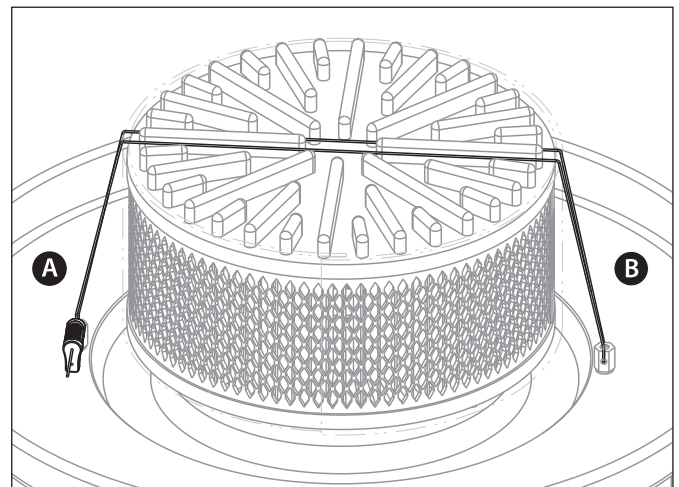

If your vacuum head does not have anchors A and B then you cannot use the cable lock.

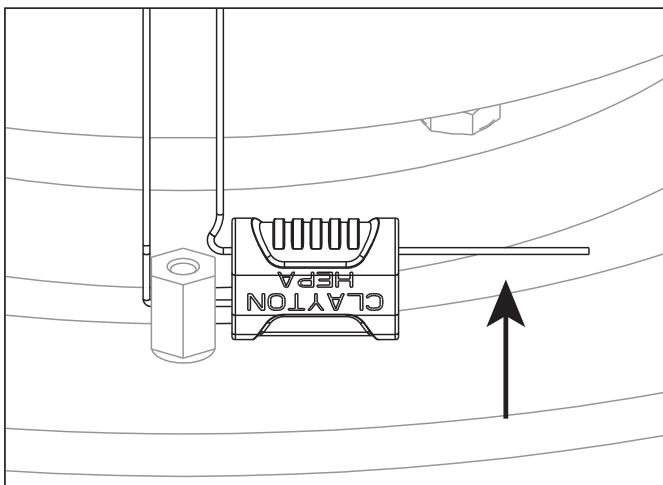

Inset cable as shown thru hex standoff A

Cross over top of HEPA and inset thru hex standoff B

Cross back over HEPA and insert into yellow lock as shown

Pull tight with pliers and cut off excess as required
