The Posi-Vac insulated job box can be used to store resin, adhesives, paints, or anything that needs to be kept cold. This beast of a cooler will keep ice frozen for days in normal environments, and even longer for you troops stationed in Alaska. Tough wheels and a flip up handle let you easily move this bad boy, even when it's packed with ice and supplies, and the molded handles make it easy to lift into your vehicle. Unit includes pressure relief valve, padlock, cargo net, and a bluetooth temperature sensor to actively monitor internal temperatures. Roll one into your shop today!

Our portable pneumatic recirculating Spot Blaster is a tiny powerhouse. It removes corrosion and coatings from fasteners and small areas. You choose your blast media, and this tool does the rest. A pull of the trigger, and the media is safely delivered in a enclosed concentrated blast. The integrated Scorpion HEPA vac collects and recirculates the media. Kit includes the Spot Blaster, multiple nozzle tips, extra HEPA filters and pre filters.

RHINO

MOBILE WORKCENTER

The Clayton Rhino Mobile Work Center is a full featured work center designed specifically around the needs of aerospace composite repair and LO professionals.

The Rhino provides vast storage space for all your tools and two-color foam is included to maintain compliance with tool control tech orders. The side doors swing 180° to support the hinged cover, revealing a spacious 10' work surface covered in a self healing cutting mat, surrounded by a border of cork to protect cutting tool blades.

A retractable 50' electrical cord provides power to the Rhino internal and external electrical charging stations and allows for electrical distribution and overnight charging of battery operated tools. Charging can occur even when the kit is locked and secured.

Get the Rhino Mobile Work Center alone or the Rhino Mobile Work Center for Vacuum Sanding which includes two portable Clayton Hornet HEPA vacuums for source capture dust collection and for FOD cleanup. It also includes vacuum sanders and accessories, and an assortment of cleanup tools.

MOBILE PAINT BOOTH

The Clayton Mobile Paint Booth is a portable inflatable enclosure that allows painting almost anywhere. The booth evacuates overspray and keeps the inside of the booth free of airborne particulate. Each unit has a wide entrance, allowing easy access with large parts or rolling carts. The clear side panels provide plenty of light to illuminate the work area. The entire booth, powered by 120V portable blowers, inflates in under 2 minutes. Deflated, it fits into a forkliftable composite crate.

Each kit includes: Inflatable Booth, Blower, and storage crate.

Neshap Filter / Carbon Filter Panels discharge clean filtered air

Filtered air enters booth at the rear

**Contaminated air exits through side filters
Main Entry unzips for large vehicle access**

**23ft x 40ft Booth
6 side windows and front entry windows let in plenty of light.**

The **Tent & Vent** is a high flow air filtration unit designed to allow aircraft painting on the hangar floor without exposing workers to overspray and VOCs. This unit adheres to NESHAP Test Method 319 for Aerospace painting and de-painting operations and meets all standards for the safe evacuation and filtration of chromated primers and other coatings. The powerful air motor delivers over 1200 cfm of air flow to easily evacuate 12x10x10 painting tents. The air powered system consumes 60 CFM @ 90 PSI. NSN includes Tent & Vent, 18" inlet extension, 12" muffler, grounding cable, 30' compressed air line, poly film, and a supply of primary and secondary filters to ensure that you'll be operational upon receipt of the unit.

Testing performed by the US Military showed that the Tent & Vent maintained exposure levels below both the Action Level and the Occupational Environmental Exposure Limit for Hexavalent Chromium.

The NIOSH Approved Clayton **Respirator Hood** by PureFlo is a game changer in PPE. This innovative system protects workers from injuries to the head, face, eyes, and respiratory system, and is ideal for work in areas where chromates, heavy metals, silica, and other hazardous dust is present. The unit is completely self-contained, with no need for belt mounted blowers or hoses to encumber the user. The battery powered filter system maintains positive pressure inside the hood, providing 8 CFM of airflow to ensure that dust and debris cannot enter the breathing zone. The constant airflow also creates a cooling effect and keeps the visor free of fog. It has a wide field of view and is perfectly balanced to reduce fatigue. Unlike conventional half and full face respirator systems, the Clayton Hood does not require respirator fit checks, and it can be used with all types of facial hair.

Respirator Hood Starter Kit			
Item No	GSA	NSN	Desc
130152			Respirator Hood Starter Kit
627-R02020SP			Respirator HEPA Filters 8 PK

Kit includes:

- Respirator Hood Assembly
- 8 Pack of Replacement Filters
- 1 Storage Backpack
- Visor Protector Films
- 2 Headband Assemblies
- 2 Sets of Replacement Padding
- 1 Set of Cleaning Wipes

Features:

- Filter monitor alerts when filter is saturated
- Battery monitor alerts when power is low
- Batteries provide 7 hours of constant use
- Constant airflow prevents fogging of visor
- Airflow has significant cooling effect for user
- No need for fit checks
- Facial hair friendly – Bring your favorite moustache
- Wide field of vision
- Adjustable headband
- Electronic battery and filter monitor

Specifications:

- Head Protection ANSI Z89.1 Type 1 Class G
- Face/Eye Protection ANSI Z87.1+
- Respiratory HEPA (HE) NIOSH 42CFR84
- Flow Rate 8.1 CFM
- Noise Level <70 dBA
- Weight 4.9 lbs
- Battery Duration 7 hours
- Rating Class I, II, III, Div 2 Groups ABCDEFG

Assigned Protection Factor APF 1000

Can You Hear Me Now? Hearing protection is critical on flight decks, at the range, and in manufacturing or maintenance. These over-the-ear silencers provide 30dB of noise reduction, and are comfortable to wear. Packed in a tough cordura pouch with a secondary pocket for the included ANSI safety glasses. This is a great kit that provides key protection for most environments.

Back That Thing Up! High quality American Made backup pads are designed to fit most industrial sanders. Vinyl faced pads feature a 5- or 6-hole pattern and are used with Gold PSA abrasives. Grooved pads are also for PSA abrasives, but feature dust channels so they work great even if the holes aren't lined up. Multi-hole J-Hook pads provide the best possible dust collection, and have hooks that attach to Screen Abrasives or Clean Sanding discs.

Right Angle Shrouds are designed to collect dust and debris when sanding or grinding with 2" or 3" abrasive discs. They fit any grinder with a 1/4" collet, and have a multi-hole pad to improve efficiency. The Clear Revolution shrouds are molded from clear Lexan. The Aluminum Revolution shrouds are machined from aircraft grade aluminum and anodized.

GV-100MK			Gun Vac Military Kit

Python HEPA Vacuums safely capture hazardous dust and debris and prevent exposure during bag changes. The continuous bagging system allows the material inside to be disposed of safely. Simply twist the top of the bag, and secure with two cable ties. Cut between the two ties, and continue operating the system. The design allows bag changes right on the shop floor, without special protective gear.

**CLEAN
SAFE
CONVENIENT
EFFICIENT**

Electric
212 cfm & 98in H2O

HOW IT WORKS

Step 1

Seal the bag cassette at one end with a cable tie. As the bag fills up, simply pull down to draw more material from the cassette.

Step 2

To make a new bag, pull the material down and seal it at the top with a cable tie.

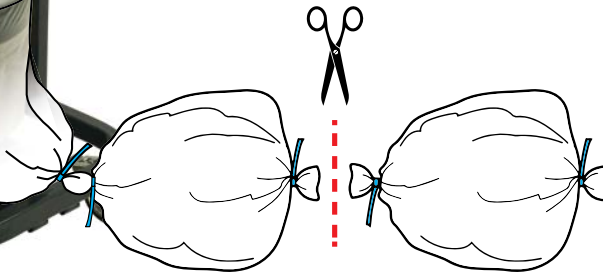

Step 3

Add another cable tie above the first one and cut the bag material off between the two cable ties.

The entire process takes less than 30 seconds!

Shred It and Forget It! The Powershred cross cut shredder will handle 18 sheets of paper per pass. It cross cuts to a Security Level P-4, and handles staples, credit cards, paper clips, and even that CD of George Michael's Greatest Hits that you don't want anyone to find out you still own. The unit features a 9-gallon bin and comes with a plastic liner, a large supply of extra bags, and a surge protected power strip.

PET Braided Sleeving is an expandable mesh tube that can be used for many applications. Use it to bundle wiring harnesses, protect hose or tubing, or to add higher visibility to cords or cables. The sleeving can be cut with scissors, or with a hot knife to seal the ends. Two sizes of sleeving fit most needs. Cold Shrink Tubing provides you with a pre-expanded rubber sleeve that contracts down when the internal spiral ribbing is removed. Use it to hold the braided sleeving on wiring bundles, or use it as a heavy duty grip on tools.

FF-RPK01			J-B Weld Kit

When fixing it is the only option! This kit contains an assortment of repair wraps for onsite fixes. Just dip the rolls of resin soaked fiber in water, then wrap around broken tools, tent poles, or anything in need of repair. Ten minutes later, it will dry hard as steel. Always be prepared! Use Repair Wrap for general purpose fixes (tools, pipes, etc.) Use Heat Wrap for high temperature fixes like exhaust pipes.

Kit Includes:

- 1 – JB Weld Plastic Bonder Epoxy
- 2 – JB Weld Exhaust Wrap
- 2 – 2" Pipe Repair Wrap
- 2 – 2" Permanent Repair Wrap
- 1 – JB Weld RTV Sealant
- 1 – SuperWeld Extreme Glue (0.53 oz)
- 1 – 2-part Epoxy (2x 5 oz tubes)
- 1 – Tactical Shears
- 1 – Gear Bag

If you're working with toxic heavy metals like HexChrome, Nickel, Mercury, Lead, Cadmium or Zinc then you need **Hexoff**. It is specifically designed to remove toxic heavy metals from the skin and other surfaces.

415-DS07			Hexoff Decon Station (No Wipes)
415-SC01Q			Hexoff Surface Cleaner Spray 1qt

ChromeKiller™ neutralizes and removes Hexavalent Chromium, Cr(VI). Developed to suit the needs of the USAF, it removes Cr(VI) and converts it to non-toxic Trivalent Chromium Cr(III). It can be blended into other cleaners for use on aircraft and components.

HexChecks™ are a fast test method for determining the presence of Cr(VI).

HexChecks change color in the presence of Cr(VI). From white, to pink, to purple, the darker the color, the higher the concentration. Each Kit includes 30 HexChecks, 1 gallon bottle of ChromeKiller concentrate, and 2 empty spray bottles.

Clean Up Your Act! Our shop supplies will help keep your shop and your equipment clean after the day is done. Tough Wipes handle industrial spills and greasy cleanup. Reusable sponges and cloths are reinforced to stand up to heavy use and abuse. They can absorb water and grease, and still stay strong. Wiping sheets measure 8" x 17" and are packed 2 rolls per box. Each roll has 400 sheets. Sponges measure 4.5 x 3" and are packed 100 per box. The wipes and the sponges each include a 5-pack of industrial garbage bags. The bags are also available on their own in 5- and 25-pack quantities. Four-packs of plungers will help your shop avoid those embarrassing clogs after the all-you-can-eat buffet lunch.

HOW IT WORKS

Step 1

The bag cassette is sealed at one end with a cable tie. Once the bag starts to fill up, you just pull it down and new material is drawn from the cassette to make the bag longer.

Step 2

To make a new bag, pull the material down and seal it at the top with a cable tie.

Step 3

Add another cable tie above the first one and cut the bag material off between the two cable ties. The entire process takes less than 30 seconds!

Captain Hook and Sergeant Loop - This box of hook and loop fastening strips is great for just about every application. Each box contains 25 yards of hook and 25 yards of loop material, 1" wide with a peel and stick backing.
